The **European Union Ecolabel**, or European Eco-label, is the official European system for recognising and identifying environmentally friendly products and services. This label addresses the effects that a certain product or service has on the environment with a life cycle perspective, from the extraction of raw materials to their final destination.

405 products from Basque companies have the European Union eco-label.

The **EMAS** (Eco-Management and Audit Scheme) environmental management system is the Community Eco-Management and Eco-audit Regulation, a tool developed by the European Union that recognizes those organizations that have implemented an EMS (Environmental Management System) and have acquired a commitment to continuous improvement, verified through independent audits.

93 Basque organisations are registered in EMAS.

The European Union Ecolabel

Role of the Department for Economic Development, Sustainability and Environment and Ihobe within the field of the European Union Ecolabel

Regarding the European Union Ecolabel, the competent body in the Autonomous Community of the Basque Country is the Department for Economic Development, Sustainability and Environment, through its Deputy Ministry for Environmental Sustainability. Ihobe's role regarding the European Union Ecolabel is to support the Department in processing such applications.

There are currently Basque companies in **10 categories** of the EU Ecolabel, out of a total of 24 existing categories.

There is a total of **54 Basque companies with products certified** with the Ecolabel, of which the vast majority have products registered in a single category.

1 Throughout the document, each category is also identified by its corresponding numbering, a numbering defined in the Decisions governing the award of the ecolabel for each of the categories. This numbering serves to identify each of the categories in the numbers of certificates granted after the award of the label.

2 In the column "No. of companies", those companies that, having a certificate in this category, have also been granted certificates in other categories have been identified in brackets. Particularly, there is one company that has certificates in categories 19, 20, 30 and 38 and another company that has certificates in categories 4 and 30.

No. of products and certificates that have been managed along the 2022 financial year

- Rural accommodation: <http://ec.europa.eu/ecat/hotels-campsites/en>

No. of products with European Ecolabel in Spain

Number of certificates with European Ecolabel in Spain

The Autonomous Community of the Basque Country is the **third community (14%) with the most products** with an EU Ecolabel, after Catalonia and Aragon (43% and 18%, respectively). However, if we consider **the no. of certificates obtained, the Autonomous Community of the Basque Country ranks second, with 20% of the Ecolabel licences** in force, behind Catalonia (28% licences).

The Autonomous Community of the Basque Country is the community that holds 100% of the products certified in the "**Furniture**" category.

68% of the tourist accommodations certified in Spain are in the Autonomous Community of the Basque Country.

However, there are categories in which ecolabels are not available. **These categories are:** dishwashing detergents, industrial and institutional laundry detergents, laundry detergents, textiles, rigid coatings, wood-based coatings, cork and bamboo floor coverings, crop substrates, floor and floor coverings amendments, lubricants, electronic equipment, personal hygiene absorbent products, **animal care products, footwear, mattresses and printed paper, desk paper and paper bags**. In these last 4 categories there is no certificate at state level.

Representativeness of the products and certificates of the Autonomous Community of the Basque Country with regard to the remaining Europe

The certificate accounting figures carried out by the EU not only include as variables the no. of products or certificates (licences) but also other elements such as the no. of countries in which the product is sold or the different names under which the same product can be marketed.

However, by extrapolating the data of the European Commission in relation to the representativeness of the products⁴ and certificates at state level and subsequently extrapolating the Basque data estimated in this report, the following representativeness of the Basque products and certificates can be obtained in relation to the total ecolabels of the European Union.

	Representativeness Report Nov 2022 EU			ECAT representativeness ⁴			Estimate
	EU	Spain	% Spain/EU	Spain	Basque Country	% Basque Country/Spain	% Basque Country/EU
Products	87,485	18,107	21%	2,899	405	14%	2.82%
Certificates	2,270	338	15%	288	58	20%	2.9%

Therefore, we can estimate that currently **the no. of products with the EU Ecolabel of the Autonomous Community of the Basque Country represents approximately 2.82% of the** products with this label at European level, a percentage similar to that of the **no. of certificates (2.9%)**.

⁴ Data published by the European Commission for the financial year 2022 can be found at <https://ec.europa.eu/environment/ecolabel/facts-and-figures.html>. The data are published semi-annually, meaning that they correspond to the latest published data (November 2022).
